The Lightness Matrix
QUT Creative Industries Precinct Artist-in-Residence Glen Henderson

FROM 24 November to 5 December the Parer Place Outdoor Screens of QUT’s Creative Industries Precinct will become an expanse of colour and light from dusk until late.

Glen Henderson, the Precinct’s first Artist-in-residence, exhibits The Lightness Matrix.

This work unites, extends and melds Henderson’s persistent interests of over more than a decade of intense and prolific aesthetic practice.

As the name ‘matrix’ implies the artist charts and navigates across spatial planes as biomorphic forms coalesce with patterned, abstract formations and virtual images.

A late career artist, Henderson has been uninhibited in her exploration across media and fields of thought.

To describe Matrix One, she explains ‘Thought is nomadic. Lines, like thoughts, grow from a point. Any point can be connected to any other through interior and exterior channels, or leaps across fissures’.

The Lightness Matrix as exhibited on the Parer Place Screens, is a vibrancy of colour and pattern as the magnified architectural and organic shapes resonate and expand.

In this exhibition Henderson draws from an evolving study of long interest - spatial architecture and science. Viewers may observe a resurgence of codes and diagrams that inform her interdisciplinary practice.

‘As a maker of imagery I feel like a disjunctive poet bringing complex elements together and this work is an invitation to enter stage one of a space-time continuum,” Glen said.

From the smallest living organisms to designed and fabricated formations the lightness matrix looks at the way things are connected.

To invite coalescence beyond the visual into the sound realm Glen engages with sound construction group vOiCeArT.
